# Desmasystem

## The fastest, most versatile matrix stripper on the market

Servo-controlled tangential waste matrix removal system that adapts to any press. Up to 750 mm reel diameter and 530 mm web width, with control of speed, torque and acceleration.

**750 mm**

MAXIMUM REEL DIAMETER

**530 mm**

MAXIMUM WEB WIDTH

**Servo-controlled**

SPEED, TORQUE AND ACCELERATION

### Complex shapes

It handles complex materials and shapes quickly and without breaking the matrix.

### Horizontally moving shaft

Thanks to the horizontal movement of the stripping shaft, the distance to the stripping point never changes.

### Controlled tension

Pressure control during matrix rewinding to maintain tension at all times.

IN OPERATION

# The matrix is never left on its own

ADVANTAGES

# What your production gains

01

### 100% customisable

A system completely independent of the press it is installed on: it doesn't affect its software, electronics or mechanics.

02

### Precision and speed

It maintains the stripping speed even with the most complex shapes or thin edges.

03

### Simple operation

An intuitive, very easy-to-use interface: a less specialised operator is needed.

04

### Fewer errors

Its reliability substantially reduces human and machine errors.

NEXT STEP

## Which labels are giving you trouble?

Tell us the shape, the material and the press you produce on. We will tell you whether the Desmasystem solves it and send you a proposal.
